

PA DREAM TEAM LEHIGH VALLEY

CAREER AWARENESS
PROGRAM Fall 2020
Virtual Resources for
Educators

Serving Lehigh and
Northampton County
school districts since 2015

LEFT: PA Dream Teamer
Chelsea, an Air Products
Engineer, presents to the 2nd
Year Physics Class at Emmaus
High School in 2018

1 The Career Interview via Zoom

Dream Team members will answer a variety of selected interview questions relating to their education, childhood aspirations and daily job responsibilities on site at their manufacturing jobs. Participants will catch a bird's eye view of the career work environment in STEM fields and learn directly about career pathways. Props will be employed to illustrate job duties/tasks. Additional impromptu questions will be answered by Dream Team members as time/interest permits. Interview packet of questions will be sent to the teacher/zoom facilitator. **(30 minutes)**

2 Career Presentation with Project Learning

Dream Team members will tell their specific career journeys via a zoom connection, power point presentation and discussion of education, required course work/beneficial internships and day to day job duties. Members will also demonstrate a hands-on learning activity illustrating skills needed in this particular occupation that can be teacher led at a later date in the classroom. Packet of materials for the hands-on activities/classroom project will be delivered to the school in advance of the session. Dream Team members can connect via zoom later in the week to answer questions relating to project work. **(45 minutes)**

3 Virtual Company Tours

Dream Team members will take you on a virtual tour of their manufacturing sites using our library of **What's So Cool About Manufacturing** Videos, www.WhatsSoCool.org. Members will answer questions about their specific journey to employment through a combination of education and experience. Members joined by Human Resource colleagues will share a forecast of needed occupations at their particular manufacturing sites. **(30 minutes)**
